All Residents

General Update / Reminder

Dear Residents

First of all, I hope you are well.

Council’s Collection of Rubbish and Use of the Bin Stores

As you may be aware, the London Borough of Redbridge Council have made necessary changes to their refuse collections during the Covid-19 virus pandemic. This has meant that certain services like Garden Waste Collections and Recycling have been stopped until further notice. They have asked that recycling items be disposed of with your household rubbish or collected (if you have the space) until the recycling services have resumed.

It has recently come to our attention that since the Council have stopped the garden waste collections, the bin in the Bin Stores are being used to dispose of garden waste which must stop immediately. You are to keep the garden waste within the gardens of your property until the Council resume collections.

The bin stores are solely for the use of residents living in an apartment and for domestic household waste only. Freehold houses are reminded that they are not to use the bin stores at any time.

There is only enough capacity in the bin stores for general household waste so we cannot have people disposing their garden waste in the bins, and using them when they should not, taking up much needed space. As many of you will be staying home right now, due to the Covid-19 Government advice, there is naturally going to be an increase in general household waste, so please be mindful of this.

Easter Bank Holiday Weekend

I would like to take this opportunity to remind everyone the importance behind social distancing, and the guidance given by the government; and what it means to life on Repton Park this forthcoming bank holiday weekend and until the restrictions are lifted by the government.

I fully appreciate that this is going to be a real test for everyone, being away from family, friends and loved ones whilst on lock down. We must however make a real effort and remember the reasons why these restrictions are in place. No one likes having their life and movement restricted, however the government have made these requests for a reason. To stop the spread of the COVID-19 and to SAVE LIVES! The sooner people take this seriously, then the quicker some kind of normality can be restored.
In light of the above, I need to be very clear with what is expected on the park. Residents should only be leaving their home when it is absolutely necessary. If you do leave your home then it should only be to exercise (once a day), walk your dog (always on a lead and under your control) and go shopping for urgent supplies such as food and drink.

Residents should not be having visitors to your home and entertaining. This includes close friends and family to reduce the spread of COVID-19. I know it’s not nice, however I urge everyone to play their part within the Repton Park community in an effort to reduce the risk of a coronavirus outbreak on the development. Please be respectful of the guidance and practice social distancing at all times. If there was ever a time to be respectful of the rules and show consideration to the development, site staff and your fellow neighbours; it is now!

Repton Rainbows Campaign

I would like to say thank you to everyone who has got behind the Repton Rainbows Campaign. I have received a lot of positive feedback over this. Your pictures and displays are creating many smiles and happiness on the park and the efforts have been brilliant. Please keep them coming! 😊

I cannot think of a better way for a community to show their support and togetherness during these darker times. The rainbow has become very symbolic; giving people hope and also a way of acknowledging all the hard work of the NHS, and the other amazing people who continue to go to work and put themselves at risk in an effort to win the battle against the coronavirus.

Thank you for your attention, please abide by the government guidelines, and most importantly, please stay safe. Assuring your best interests at all times.

Yours sincerely

MATTHEW SNELLING
Development Manager
